Ceger, Cipayung District, East Jakarta

Highly motivated and dedicated Informatics Graduate with a strong passion for continuous self-improvement and a keen interest in pursuing a career as a Technology Developer. Proven ability to leverage a solid academic foundation and hands-on experience in web development to contribute effectively to dynamic and innovative projects. Demonstrated collaboration skills gained through active participation in university events and organizational roles. Committed to staying abreast of the latest industry trends and technologies, focusing on Fullstack Development (NodeJs, NextJs, Nuxt) for a successful transition into the professional realm.

Education

Universitas Pembangunan Nasional Veteran Yogyakarta Jul 2021 – Oktober 2025
Bachelor of Informatics Major, 3.18/4.00

Work Experience

Suitmedia (MagangHub by Kemnaker) - **South Jakarta** Dec 2025 - Jun 2026
Junior Frontend Developer

- Engineered a dynamic, schema-driven frontend architecture for iClus (Insurance Claim Utility System) using Nuxt 4, Vue.js, and Tailwind CSS, replacing repetitive template code with a scalable JSON-driven component system capable of rendering 60-80 distinct data attributes conditionally.
- Orchestrated parallel data fetching across 10-15 API clusters (handling master data, user profiles, and dynamic policies) and integrated the Tus protocol to ensure resilient, resumable large document uploads without timeout failures.
- Secured Phase 1 delivery for enterprise applications (PLN Indonesia Power KMS and SIER Sport Arena) by stepping in during the final development stages to build secondary features and execute critical bug fixes

StepUp Project - **Sleman, Yogyakarta** Jan 2024 – Jun 2025
Co-Founder - Fullstack Developer
https://www.instagram.com/stepup.project

- Led a 3-person development team within a 6-member agency, architecting the MERN stack infrastructure, managing task delegation, and overseeing Git repository workflows to ensure conflict-free, continuous deployment.
- Architected 75% of the backend systems for multiple SME web applications, most notably developing the API and database structure for "Absensi Teh Idaman," a Next.js/Express-based online attendance system supporting a franchise with over 400 branch locations.
- Developed full-stack company profiles (SwanBag, Buket Byatiq) to digitize local business operations, handling both frontend integration and backend deployment.
- Drove the agency's EduTech initiatives by conducting technology research, producing educational social media content, and hosting knowledge-sharing sessions for the local tech community.

Organizational Experience

Badan Eksekutif Mahasiswa Universitas (BEM KM) Apr 2023 – Jan 2024
Staff
Campus Issue Analysis Staff

- Coordinated "DIKSI" (Diskusi Berisi), a university-wide discussion forum attended by 100+ students, by delegating responsibilities across the event committee and managing end-to-end operational execution.
- Conducted in-depth policy analyses on critical university affairs and advocated for student welfare by publishing data-driven insights and demands on social media to raise awareness across the student body.
- Represented the student body in official institutional visits to the Ministry of Defense (Kemenhan) and the Ministry of Education and Culture (Kemendikbud), actively participating in policy discussions regarding higher education initiatives.

Panitia Pemilu Raya Mahasiswa UPN "Veteran" Yogyakarta Nov 2022 – Jan 2023
Chairperson of Committee

- Directed and managed a 17-person committee to successfully execute the university-wide student elections across the university, faculty, and department levels
- Oversaw the end-to-end election lifecycle, establishing clear operational workflows and delegating responsibilities to ensure compliance and transparency.
- Coordinated cross-functional tasks, actively monitoring team performance and resolving logistical bottlenecks to guarantee a seamless voting process.

Skills

- **Hard Skills**: **Frontend –** Javascript, ReactJs, NextJs, Nuxt, React Native

  Backend – NodeJS, ExpressJS

  Database & ORM – MySql, Postgres, MongoDB, Prisma, Supabase

  Tools – Git, GitHub, GitLab, Docker, Postman

- **Soft Skills**: Leadership, Planning, Analytical skills, Problem solving, Team Work, Adaptive

Course

CodePolitan - AlibabaCloud Sep 2023 - 2024

- Mastered full-stack JavaScript development principles, focusing on building scalable backend architectures and dynamic user interfaces.
- Engineered robust web applications by leveraging modern server-side frameworks like Express.js and NestJS to design efficient RESTful APIs.
- Developed and deployed multiple end-to-end web projects, demonstrating a strong command of the complete software development lifecycle.

Projects

- **StepUp Project – Absensi The Idaman – Expressjs, MySQL, VPS Deployment, CI/CD** (2025): Developed the backend system for an employee attendance application for a business with more than 400 outlets. Focused on creating a scalable API using Express.js and MySQL. Managed full deployment to a VPS and implemented a CI/CD pipeline to automate the release process.
- **Suitmedia – IClus(Insurance Claim Utility System) – Nuxt** (2026): Developed the central claims processing workflows and administrative features for an insurance utility platform. Built an interactive, multi-step claim engine featuring dynamic validation logic, dynamic role-based UI rendering, and comprehensive document handling. Delivered the complete end-to-end flow from initial drafts to final appeals, as well as the supporting User Management and Master Data systems.
- **Suitmedia – SIER Sport Arena – Nuxt** (2026): Developed a comprehensive frontend dashboard for a sports venue booking and management platform. Engineered complex, multi-step asynchronous forms featuring multi-language support, dynamic dependent fields, and real-time validation. Optimized state management and API payload handling to ensure seamless venue administration, scheduling, and payment processing.
- **Suitmedia – Indonesia Power Knowledge Management System – Nuxt** (2026): Developed and optimized the frontend of an enterprise-level Knowledge Management System. Engineered complex, interactive modules using a Configuration-Driven UI (CDUI) architecture and Zod schema validation. Resolved critical Vue reactivity bottlenecks, optimized Nuxt data caching for seamless navigation, and enhanced overall user experience using customized Nuxt UI components and dynamic state management.
